# Ball Valves

*Better by  
Design*

## TODO® Ball Valves

These lightweight ball valves were the first products to be developed by TODO® and offer obvious weight saving benefits to the road tanker industry.

They are also used in a variety of fixed plant and mobile fuelling applications, especially where compartment switching is required.

A wide selection of end connectors are available and due to the simple sandwich design, speedy valve changeover is achievable.

All sizes are available with pneumatic actuation in either single or double acting form.
